

Workshop Rio-São Paulo of Econometrics

May 4-5, 2026 – Casa das Garças

Av. Padre Leonel Franca, 105, Gávea, Rio de Janeiro

5th Workshop Rio – São Paulo of Econometrics

<https://www.econometrics.com.br/workshop-rio-sp/>

Local Organizers: Nathalie Gimenes and Lucas Lima – Department of Economics PUC-Rio

About the workshop:

Founded in 2016, the Rio-São Paulo Econometrics Workshop has established itself as an important space for academic exchange among the leading Economics research centers in Brazil.

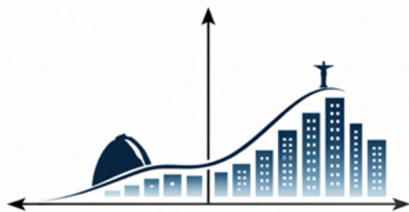

This fifth edition marks the return of the event in a more robust and internationalized format, significantly expanding its scientific objectives and bringing together researchers from leading universities in Brazil, the United States, and Europe.

The workshop aims to promote the dissemination of methodological advances, strengthen collaboration networks between Brazilian and international researchers, and integrate young researchers into contemporary debates in Econometrics.

All sessions will be held at Casa das Garças, Avenida Padre Leonel Franca, 105, Gávea, Rio de Janeiro, RJ.

Sponsors and Supporters

Workshop Rio-São Paulo of Econometrics

May 4-5, 2026 – Casa das Garças

Av. Padre Leonel Franca, 105, Gávea, Rio de Janeiro

Scientific Program

1st day of the workshop: 04 May

08:30 – 09:00: Registration

09:00 – 09:10: Opening by Nathalie Gimenes and Lucas Lima

09:10 – 10:00: **Plenary Session 1: (Keynote)**

Brendan Kline (University of Texas at Austin) and **Elie Tamer (Harvard University)**

Counterfactual analysis in empirical games

10:00 – 10:30: Poster Session and Coffee Break

Contributed Session 1: Auctions, Inequality and Statistical Methods

Chair: Nathalie Gimenes (PUC-Rio)

10:30 – 11:00: Guilherme Campanha (PUC-Rio), Nathalie Gimenes (PUC-Rio), **Lucas Lima (PUC-Rio)**, Marcelo Sant'Anna (FGV EPGE) and Victor Hugo Terziani (PUC-Rio)

When help hurts: unintended consequences of set-aside auctions for small firms in Brazil.

11:00 – 11:30: James Banks (University of Manchester and IFS), Thomas Glinnan (LSE) and **Tatiana Komarova (University of Cambridge)**

Bounds on inequality with incomplete data

11:30 – 12:00: **Emmanuel Guerre (Queen Mary University of London)** and Yuting Wang (UMR GAEL, CNRS, INRAE and Université Grenoble-Alpes)

Aggregating many estimators using estimated weights

12:00 – 14:00: Lunch

Contributed Session 2: Identification and Quantile Methods

Chair: Luis Alvarez (USP)

14:00 – 14:30: **Marcelo Moreira (FGV EPGE)**, Geert Ridder (USC Dornsife) and Mahrad Sharifvaghefi (University of Pittsburgh)

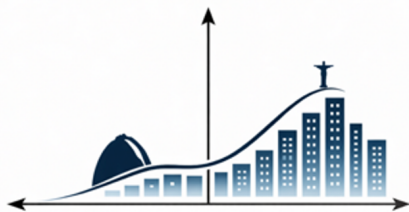

Power bounds and efficiency loss for asymptotically optimal tests in IV regression

14:30 – 15:00: Javier Alejo (Universidad de la República), **Sergio Firpo (Insper)**, Antonio Galvão (Michigan State University), Julian Martinez-Iriarte (UC Santa Cruz) and Gabriel Montes-Rojas (Universidad de Buenos Aires)

Unconditional quantile partial effects under endogeneity

15:00 – 15:30: **Luis Alvarez (USP)** and Victor Orestes (University of Pennsylvania – Wharton)

Quantile mixture models: theory and applications

Workshop Rio-São Paulo of Econometrics

May 4-5, 2026 – Casa das Garças

Av. Padre Leonel Franca, 105, Gávea, Rio de Janeiro

15:30 – 16:00: Poster Session and Coffee Break

Contributed Session 3: Causal Inference and Design-Based Methods

Chair: Vitor Possebom (FGV EESP)

16:00 – 16:30: **Konrad Menzel (New York University)**

Fixed-population causal inference for models of equilibrium

16:30 – 17:00: **Bruno Ferman (FGV EESP)**

On the use of design-based simulations

17:00 – 17:30: Luigi Garzon (FGV EESP) and **Vitor Possebom (FGV EESP)**

Nonlinear treatment effects in shift-share designs

2nd day of the workshop: 05 May

Contributed Session 4: Institutions, Beliefs, and Economic Behavior

Chair: Lucas Lima (PUC-Rio)

09:00 – 09:30: Laura Gualda (Technical University of Munich) and **Eduardo Mendes (FGV EESP)**

Learning about corruption: a statistical framework for working with audit reports

09:30 – 10:00: **Raphael Corbi (USP)**, Thiago Ferraz (USP) and Fabio Sanches (FGV EESP)

The industrial organization of belief: market size, church expansion, and religious change

10:00 – 10:30: Luis Alvarez (USP) and **Cristine Pinto (Insper)**

Collaboration and competition in R&D networks: dynamic econometric approach

10:30 – 11:00: Poster Session and Coffee Break

Contributed Session 5: Time Series Methods and Applications

Chair: Eduardo Horta (UFRGS)

11:00 – 11:30: Bernardo Costa (FGV EMap), Raul Riva (FGV EPGE) and **Rodrigo Targino (FGV EMap)**

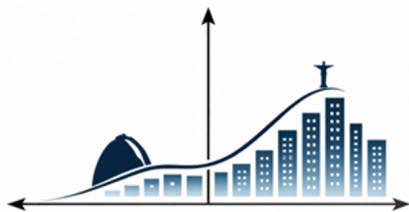

Risk-budgeted mean-variance portfolios

11:30 – 12:00: Rodrigo Fonseca (UFRGS), **Eduardo Horta (UFRGS)** and Sabrina Mulinacci (University of Bologna)

Product disintegrations of Markov chains: an application to EVT

12:00 – 12:30: Yining Chen (LSE), Shakeel Gavioli-Akilagun (City University Hong Kong) and **Flavio Ziegelmann (UFRGS)**

Detecting changes in production frontiers

Workshop Rio-São Paulo of Econometrics

May 4-5, 2026 – Casa das Garças

Av. Padre Leonel Franca, 105, Gávea, Rio de Janeiro

12:30 – 14:30: Lunch

Contributed Session 6: Macro-Finance and Risk Factors

Chair: Sarah Mouabbi (Banque de France)

14:30 – 15:00: Fabio Araujo (Bacen), Antonio Galvão (Michigan State University) and **João Victor Issler (FGV EPGE)**

A non-arbitrage to asset pricing using panel data

15:00 – 15:30: Robert Engle (NYU Stern) and **Susana Martins (Católica-Lisbon)**

Novel global and regional geopolitical risk factors

15:30 – 16:00: **Sarah Mouabbi (Banque de France)**, Jean-Paul Renne (University of Lausanne) and Adrien Tschopp (University of Lausanne)

Inflation and growth risk: balancing the scales with surveys

16:00 – 16:30: Poster Session and Coffee Break

16:30 – 17:00: **Plenary Session 2: (Keynote)**

Giuseppe Cavaliere (Univ Bologna and Univ of Exeter), Luca Fanelli (University of Bologna) and Iliyan Georgiev (University of Bologna)

Bootstrap diagnostic tests

Poster Sessions:

Acácio Andrade (FGV EESP/USP): *(Partial) Identification of effects of winning politician characteristics*

Anna Catarina Tavella (PUC-Rio): *The evening ramp and electricity prices in Brazil*

Davi Siqueira (FGV EESP): *Partial identification under stratified randomization*

Murilo Cardoso (FGV EESP): *Treatment-effect heterogeneity and interactive fixed effect: Can we control for too much?*

Nicolas Moura (FGV EESP): *Randomization inference for weather shock designs*

Paulo Ramos (Insper/PPGE-FEARP USP): *How efficient is Brazil's FX futures market? Evidence from a large-scale order-book dataset*

Tito Bruni (PUC-Rio): *Crossing the line: revenue thresholds and firm participation in public procurement*

Vinicius Sá (PUC-Rio): *The price of a view: the pandemic, housing markets, and homelessness*

Vítor Gentini (FGV EPGE): *NEWS IV: A model with news and implied volatility for enhanced volatility prediction*

Vitória Wendt (Insper): *Nonparametric test for the equality of conditional distributions in selection models*

Yuri Góes (FGV EPGE): *Regularization methods for parametric estimation under many weak moment conditions*
